

TRIBOLUBE®

Dive with confidence and peace of mind.

With over 35 years of cutting-edge science, Aerospace Lubricants is proud to offer **Tribolube®** and the **Pro Series®** - a line of products that is furthering the sport of scuba diving. Unlike competitive products, **The Total Package** of products offers superior extreme pressure and anti-wear properties extending equipment life by dramatically reducing corrosion and sticky, residue buildup.

With breakthrough science and technology, Tribolube's® revolutionary formulas make underwater breathing easy, no matter how harsh the climate. Innovative packaging allows for a more accurate application, making The Total Package® products easier to use than competitive brands.

It's Proven!

Oxygen-Compatible Products

The Tribolube® line of products listed below are oxygen-compatible and safe with o-rings and materials used in the scuba industry. Each product shown below is available in a variety of sizes, is non-toxic and oxygen-compatible.

Tribolube® 71 lubricant is specifically designed for **Nitrox/open and closed** circuit diving systems and is LOX/GOX compatible.

Tribolube® 66 lubricant is designed for **open** circuit diving systems only and is LOX/GOX compatible.

Tribolube® KO₂ cleaner is designed for the removal of PFPE lubricants used in **open and closed** circuit diving systems. This cleaner should be used in conjunction with your standard oxygen cleaning system process.

Tribolube® EPO₂ protectant is non-toxic; formulated to reduce galvanic corrosion, protect brass and other metals and is LOX/GOX compatible.

Tribolube® USCF is formulated for use in ultrasonic cleaning equipment for the removal of PFPE lubricants used in open and closed circuit diving systems. This cleaning fluid should be used in conjunction with your standard oxygen cleaning system process.

TRIBOLUBE®

The Total Package

Corrosion Inhibitors & Lubricants

Available in 9 oz. aerosol cans, our synthetic spray lubricants and corrosion inhibitors are the most advanced on the market. Aerosol products available in the continental U.S. only. Non-aerosol products available outside continental U.S. **THE PRODUCTS BELOW ARE NOT FOR USE IN OXYGEN SERVICE.**

PRO SL® is the corrosion inhibitor and penetrate that prevents rust, stops squeaks, quickly loosens rusted parts and lubricates. PRO SL provides 850 hours of corrosion prevention in an ASTM B-117 salt fog test, lasting over 700 hours more than the leading competitor.

PRO 21® is an anti-friction, anti-rust lubricant that provides a long-lasting, thin film on any surface. It won't run or drip like an oil. PRO 21 does not contain petroleum distillates, so it won't attract dirt, and functions effectively under extreme conditions or temperatures.

Use the Total Package – It Works!

Silicone Products

Available in a variety of sizes, our silicone products are non-toxic. **THE PRODUCTS BELOW ARE NOT FOR USE IN OXYGEN SERVICE.**

PRO Si® is a non-toxic silicone aerosol formulated for marine applications. The following are just a few applications: zippers, wet suits, dive gear, spear guns, rubber products and general lubrication. Aerosol products available in the continental U.S. only. Non-aerosol products available outside continental U.S.

Tribolube® Solvent Cleaner is the best way to clean old silicon products from your equipment. This premium solvent blend makes short work removing built up dirt, grime, crud and deposits both inside and outside of your equipment. Just spray it on and wipe away foreign contaminants.

Tribolube® SC protectant is suitable for use on the internal and external surfaces of dry suits, rubber products, neoprene, polyurethane and latex. Stops oxidation, deterioration and corrosion caused by exposure to salt water.

Tribolube® 2080 Series of silicone greases are available in three unique grades: light, medium and heavy.
